ΠΛΟΗΓΗΣΗ ΣΤΗΝ ΙΣΤΟΣΕΛΙΔΑ

FOR STUDENTS WITH DISABILITIES

At THINKSAFE, we are dedicated to empowering students with disabilities by providing them with essential digital skills to navigate the online world safely and confidently. Our mission is to equip these students with the tools they need to identify and distinguish between misinformation and disinformation, protect themselves from online risks, and critically evaluate online content to make informed decisions.

FIND US ON FACEBOOK

A PROJECT TO EMPOWER STUDENTS
WITH DISABILITIES BY PROVIDING
THEM WITH ESSENTIAL DIGITAL SKILLS
TO NAVIGATE THE ONLINE WORLD
SAFELY AND CONFIDENTLY

Our project focuses on several key objectives:

- **Promote Critical Thinking and Analysis:** We aim to foster critical thinking and analytical skills among students with disabilities, enabling them to critically evaluate online information.
- **Raise Awareness of Online Risks:** We educate students about the potential risks they may encounter online and how to navigate these safely.
- **Encourage Responsible Online Behavior:** By promoting awareness of online etiquette and responsibility, we strive to create conscientious digital citizens.
- **Create a Safe and Inclusive Online Learning Environment:** Our goal is to ensure that students with disabilities feel safe and included in the digital learning space.
- **Bridge the Digital Divide:** We work to ensure that students with disabilities have equal access to the tools and skills needed to succeed in the digital age.

- OUR PARTNERS -

Istituto Comprensivo Di Vittorio Padua
Più ha 155 teachers (48 primary, 110
secondary) and over 1.100 students
aged 6-14. It includes primary and
middle school (grades 1-8).

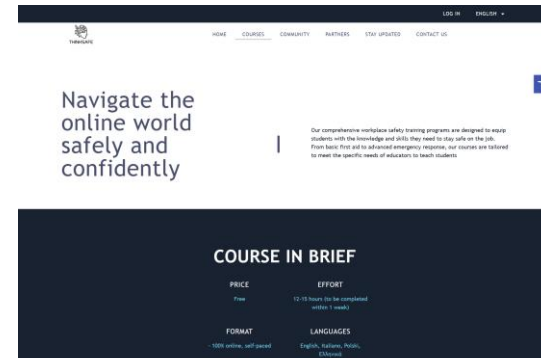

Liceum Digitalisstadige Im. Kraka Jane
II Schierkeleg. Founded in 1883, is a
prestigious state school in Kraków's city
center, educating over 1.000 students
aged 14-19.

The 1st Vocational Lower Secondary and
Upper Secondary School of Thessaloniki
Greece founded in 1992, and operates
for students with several disabilities

Cyberno aims to equip young people
across Greece with the technical,
social, and intellectual skills needed to
thrive as responsible digital citizens.

...distinguishing truth from falsehood can be challenging. This course delves into the critical differences between *misinformation*—false or inaccurate information shared without harmful intent—and *disinformation*, which is deliberately crafted to mislead for political, social, or economic gain.

This course equips you with essential tools to critically evaluate online content and contribute to a more informed and resilient digital community.

ΠΛΗΡΗΣ ΣΤΟ ΜΑΘΗΣΙΑΚΟ ΠΕΡΙΕΧΟΜΕΝΟ

The screenshot shows a course progress interface. At the top, there is a navigation bar with 'LOG OUT' and 'ENGLISH'. Below it, a header area contains the course title 'THINKSAFE' and a progress indicator showing '14% COMPLETE' with a green bar and 'Last activity on November 5, 2024 5:31 pm'. A blue oval highlights this progress bar. Below the header, there is a list of course content items, each with a radio button and a title. The first item, 'Lesson1_Mod3', is checked with a green circle. A blue line connects the progress bar to this first item. Below the list, there is a section titled 'Course Content' with a list of items. A red oval highlights the '14% COMPLETE' text and the 'IN PROGRESS' button. Another red oval highlights the '14% COMPLETE' text and the 'IN PROGRESS' button in a larger view below.

14% COMPLETE Last activity on November 5, 2024 5:31 pm IN PROGRESS

a. What cognitive biases can distort your understanding?
b. How to minimize the effect of Cognitive Biases?
c. Anchoring
d. Availability
e. Groupthink
f. Confirmation Bias
g. Loss Aversion
h. Probabilities (Preventiveness) misconceptions

There is a massive list of around 180 Cognitive biases (Buster Benson, 2016; 2020), but the size of this list could be attributed to several duplicate entries (Hershey H. Friedman, 2017) like renamed versions of more generic ones. Out of those that classify into one of the following two groups. The first group includes those that stem from the reliance on **judgmental** heuristics while the other includes biases that are attributable to **motivational** effects, such as wishful thinking or the distortion of judgments by payoffs and penalties (Tversky, A., & Kahneman, D., 1974 p. 1130). According to Tversky's and Kahneman's pioneering work (Tversky & Kahneman, 1974), the most common biases that stem from judgmental heuristics are **Anchoring, Availability** and **Representativeness** biases.

IN PROGRESS

Availability Bias

People have a natural tendency to over-appreciate information that is immediately available at hand (i.e. the first or last information) and to underestimate the importance/value of data that is acknowledged to exist but is not as easily remembered or accessed. Availability bias is the frequency or the probability of an event by the ease with which similar events/data can be brought to mind (Tversky, A., & Kahneman, D., 1974, p. 1127), or by recalling them from memory or by relating them to a known pattern.

The ease of recalling data from our memory is greater when the relevant information is more **vivid/salient** (it is easier to recall information) (Tversky, A., & Kahneman, D., 1974, p. 1127), more **recent** or has been **repeated** many times. However, as people are influenced by the ease with which they can recall relevant information, the ease itself does not always reflect their actual frequency (Tversky, A., & Kahneman, D., 1974, p. 1127).
